gummies

① **SMALL BATCHES**

Our gummies are produced in small batches with high quality ingredients. Every batch is infused with solventless rosin processed from material from some of the best cultivators in CO. Our process isn't simple, but it's necessary.

② **GREAT TASTE**

No more trash hash, mylar bags, or bad candy. Using only ice water extracted rosin made by our award winning hash maker, we bring exotic strains to you in edible form... gluten free and available in 32 flavors.

③ **GREAT HIGH**

We developed our own sous vide cooking process that allows us to retain high amounts of terpenes, flavonoids and cannabinoids that would otherwise be lost to evaporation. This is why we produce in small batches, further guaranteeing a higher quality gummy.

④ **TRANSPARENCY**

Our packaging is 100% recyclable, and each batch has its own custom QR code that directs you to lab reports, hash makers notes, and other information all in one spot.

Know what you eat, eat what you smoke.
